

CORAL CALCIUM

ESSENTIAL TO GOOD HEALTH

Coral calcium is the most bioavailable source for one of the minerals most critical to your body's health. Coral Calcium combines 1 gram (1000 mg) of pure coral with amino acid chelated eggshell calcium, Vitamin D3, magnesium, potassium and boron per serving. The formulation is super-charged by the addition of EnZact 77k™, our exclusive enzymatic activation and delivery system. Every day, your body performs functions that rely on calcium for success. Calcium is essential to good health. That's why more and more people are searching for an effective calcium supplement. Vitamark's Coral Calcium with EnZact 77k™ is the answer.

This exclusive formula delivers two powerful forms of calcium: coral calcium and amino acid chelate calcium from eggshell. Coral Calcium meets the trace mineral deficiencies that may cause health concerns. And calcium and other minerals address the pH balance of the body. As the bio-available forms of calcium and other alkalizing minerals are absorbed by the blood and cells, the body pH should begin to return to the natural slightly alkaline level.*
