

CRAVE ENERGY DRINK™

ENERGIZE, ADRENALIZE, VITALIZE

INCREDIBLE ENERGY!

Simply mix one packet of Crave into approximately 16oz of pure water or whatever beverage you prefer and drink slowly. In a few minutes you will feel the most incredible energy!

NO HEADACHES OR NERVOUS JITTERS

Unlike the majority of energy drinks on the market, Crave is not loaded with large amounts of sugar (less than 1gram) or artificial sweeteners so it will not give you a headache. Although many Energy Drinks give you energy, many of them also cause unpleasant nervous jitters. With Crave Energy Drink™, you just get a great feeling of energy!

NO CRASH

Crave Energy Drink™ users report that there is no “crash” after Crave, something that they often experienced with other energy drinks. In fact, Crave drinkers report that after a few hours they simply return to the normal level of energy that they had before taking Crave. Huge plus!

CONVENIENT TO CARRY PACKETS

Crave comes in individual serving-size packets which make it convenient to carry with you. No more lugging around bulky cans or bottles! Just small lightweight packets that you mix into something that is available everywhere - water! Traveling by plane? No problem! While bottles or cans of other energy drinks are not allowed, Crave packets are welcome. Once you're on board, order some water and you're ready for Energizing!

ONLY 9 CALORIES

Calorie counting? These days who isn't. Crave gives you amazing energy with only 9 calories per serving. That's the way to count calories!
