

# OMEGA III

## ESSENTIAL FATTY ACIDS

Omega III with EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid) is a source of essential fatty acid derived from the purest fish oils. Vitamark insists on both molecular distillation and absorbent technology to ensure the efficacy, potency and purity of our Omega 3 product.

Sometimes referred to as "good fats," essential fatty acids impact almost all of the body's key functions, including pain mechanisms, inflammatory processes, circulation, gastrointestinal function, fluid system, nervous system, and hormones.\* They are particularly important for the formation of healthy cell membranes.\*
