

# VITA-CHE

## SUPPORTING CIRCULATORY HEALTH

Vita-Che is a broad-spectrum nutritional supplement that supports cardiovascular health. By providing vital nutrients like vitamins, minerals, amino acids, lipids, herbals, bioflavonoids, enzymes and more, Vita-Che works in harmony with your body to counteract free radicals and oxidants that disturb cells, membranes and blood vessels, complete the citric acid cycle to complete the energy transfer within the cells, assist with the repair of tissue, and address homocysteine concerns that impact circulatory issues.

Vita-Che also helps to address obstructions, activate digestive and tissue healing enzymes, address blood circulation, edema and stronger capillaries, address blood lipid levels including LDL and HDL cholesterol normal levels, and encourage metabolism of fats into metabolites or energy. Vita-Che is the product of choice for circulatory health.
